

Analab is perfectly placed to offer a variety of products and services to support all levels of the processes involved in quality testing and compliance in the food and beverage industries. Through an extensive product range and relationships with key suppliers we can offer solutions to all the challenges you may face.

LGC is a key provider of PT schemes for the food and beverage industries, counting many of the top 20 global food and beverage businesses as customers on their routine schemes or their managed PT solutions. The largest AXIO Proficiency Testing scheme, dedicated to food microbiology, has over 2,000 participating laboratories worldwide, enabling participants to compare their performance on a truly global scale. This and other AXIO food and beverage schemes provide managers with a means to monitor the performance of multiple labs in wide geographies via group participation and reporting. This is made possible through PORTAL, the secure, multi-functional web-based reporting system exclusively available to AXIO Proficiency Testing participants.

Merck, through many of the world's leading Life Science brands, also offer workflow solutions for various applications in the food and beverage sector, ranging from sample preparation and analysis, to surface monitoring and post-testing documentation. See literature for a comprehensive guide.

Analab can also offer a variety of products to help in many key areas of the testing and monitoring processes:

## Sample Collection

For safe, fast and easy collection and storage of samples.

Sample Containers

Dippers

Water Sampling Bottles

## Sample Preparation

Reliable tools for efficient and effective testing.

Serological Pipettes

Pipette Filler

Pipettes

Pipette Tips

## Hygiene Monitoring

A versatile mix of options for comprehensive swabbing and sampling.

Surface Swabs

## Microbiology

A mixture of growth media and consumables for all your microbiology needs.

Petri Dishes

Media Bottles

Microbiology Media

Microbiology Testing

Autoclave Accessories

## Chemicals

High quality, accredited chemicals and reagents for use in relevant processes.

Dairy Testing

Indicator Papers

Cryoscope Standards

Conductivity Standards

pH Buffers

Water Purification

## PPE

Essential products for safe working in the laboratory.

Protective Gloves

Eye Protection
